

CI / CD ASSIGNMENT

Set up a CI / CD chain and release pipeline for a basic web project of your own choice

The project and the CI / CD chain must meet the following requirements...

- Use the same virtual machine image for both local testing, remote testing and remote deployment
- Contain unit, integration and Selenium tests
- Be capable of running unit, integration, Selenium and any other test separately from each other using test suites and Maven goals, profiles and properties
- Be capable of using a test server for Selenium tests
- Be capable of deploying to a deployment server if all tests are passed
