Exam Question 7

Spend about 5-to-7 minutes giving a review of your submitted work and results, concerning Assignment 7. You are expected to talk about, and thorough explanation of:

1. Brief outline of project and results of your (group's) work,
2. data, tooling, coding you (and your group) have used,
3. conclusions from your results, and perspectives on the assignment, particularly concerning Business Intelligence aspects.

I recommend breaking the review up into about 4 slides, showing plots, snippets and a concluding remark. A bit like this (example only!):
